

*We deliver ... experienced medical couriers who understand your needs.*

*When you need assistance we are here to support you.*

AeroMedevac are specialists in medical services for 'care in the air', our service is for the transfer of human tissue and stem cells internationally.

We provide professional medical courier services to hospitals, private clinics and private individuals seeking a trustworthy, efficient and cost effective transfer of sensitive medical samples all over the world.

Based in Dublin, our experienced staff ensure the safe international transmission of biological materials, including tissues and organs, across Europe and to medical facilities worldwide. A cornerstone of our service involves moving samples for fertility clinics internationally.

## What we do

Typical transfers include:

- Embryos – vitrified or slow freeze
- Oocytes
- Gametes
- Surgically retrieved sperm PESA/TESA
- Pre-chemotherapy banked sperm
- Final stock sibling donor sperm
- Ovarian tissue
- Irreplaceable IVF life science samples in general

## Why choose us

We use MVE SC 4/2V and 4/3V dry shippers which are designed for safe transportation of cryoprotocols and are the most reliable dry shippers on the market. Our service ensures all shippers are fully validated and accompanied at all times throughout the journey.

- The courier dry shipper service meets the transportation requirements of commercial airlines
- The dry shipper is accompanied at all times by an approved and security vetted courier
- Exemption from x-ray is arranged as required as part of the transfer
- We engage with airport security and airlines to provide a smooth transfer
- Flight and foreign customs documentation is managed for swift customs clearance
- Delivery date and time is pre-alerted as part of the logistics planning with airlines, airports the recipient hospital or clinic.

The dry shipper is transported from door to door. It is collected from the supplier and brought directly to the receiver. We ensure that our client's biological specimens, especially those of a temperature-sensitive nature, consistently arrive on time and in perfect condition.
